

ERROR - Installed Component Not Selected In Hardware Config

When an Error Message come up:

“Installed Component Not Selected In Hardware Config”

From the search bar bottom left corner, type **Computer Management**

Go into **Service and Applications, Service**, now double click on **Intel Graphics Command Center Service**. Select **General**, Now Change **Startup Type From Automatic to Disabled**.

Now click on **Stop, Apply & OK**.

Come out of Computer Management & Re-boot the PC.
